

Pipe Tape pressure tested

Application:	Repair of hole (Ø7mm) on pipe and con- duction of Hydro Pressure test.
Place:	Malaysia
Date:	March 2011
Job and report done by:	Local workshop and Wencon technical Supervisor.
Wencon products used:	Putty, Pipe Tape, Perago disc, Cleaner appl. tools

1. & 2.

Surface prepared with Wencon Perago Disc around the small hole in pipe. To ensure, that surface is as rough as possible.

3. & 4.

Wencon Putty mixed and applied, using protective rubber gloves according to instruction for use. Next Wencon Pipe Tape applied, as second layer around the pipe.

5. & 6.

Wencon Pipe Tape wrapped tight around the pipe with 50% overlap, minimum 9 circles, according to Wencon instruction for use.

Pipe tested with Hydro Pressure Test after fully curing. Conclusion: Wencon application can withstand at least 40 bar during test, without leaking.
