

Waste oil pipe in ballast tank

Application:	Waste oil pipe in ballast tank
Place:	Rotterdam
Date:	November 2009
Job and report done by:	Repair Management Nederland B.V.
Wencon products used:	Rapid, Coating, Cleaner. appl. tools

1. & 2.

Several leaks found on pipe. Pipe cleaned with special cleaning disc and Wencon Cleaner. Applied a thick layer of Wencon Rapid on the clean surface.

3. & 4.

Wencon Reinforcement tape wrapped around the pipe very tight in the wet Wencon Rapid, with a 50% overlap. Rapid comes through the pores of the Reinforcement tape. The Wencon Rapid surface is smootend with a radiator brush.

Wencon Coating applied as a primer layer.

5. & 6.

Wencon Coating light applied on the Wencon Rapid, to make the repair more resistant to oil and chemicals.
