

WENCON® 8725 – PIPE WRAP KIT

Designed to enable the crew to repair leaks on most types of pipes using the pipe-wrap method. Applying Interchanging layers of WENCON coating and WENCON Reinforcement Tape will seal a leak and produce a strong temporary repair, that will last until replacement or more permanent solution is possible.

SUITABLE FOR:

- Ballast pipes
- Cable pipes
- Cargo pipes
- Heating coils
- Hot pipes
- GRE pipes

The Kit includes:

WENCON Hi Temp Coating

A high performance 100 % solid epoxy coating developed to withstand temperatures up to 300° C (570°F) as well as resistant to a wide range of acids, alkaline and solvents.

WENCON UW Coating

A liquid epoxy coating that can be applied on wet surfaces or underwater. Ideal for repair of ballast- scrubber,- and cooling pipes.

WENCON UW Cream

The UW Cream is excellent for filling up holes, dents and rebuilding of surfaces which, due to high humidity, has to be done in wet conditions and underwater.

WENCON UW Putty

The UW Putty can be applied on wet surfaces or underwater. It is good at filling up holes, dents, and rebuilding surfaces.

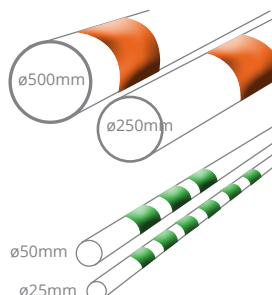

WENCON Reinforcement Tape

Is a glass fiber reinforced fabric gauze that reinforces the repair whapplied together with a epoxy coating.
